
Let's talk
Let's build

EV is different.

EV is one of the leading providers of venture and growth capital to interesting, high potential, unquoted businesses throughout the UK.

We manage a range of funds and can invest up to £2 million in UK-based companies at all stages of investment and across a wide variety of business sectors.

Our approach is both personal and forthright: taking an idea, building on strengths and talking through weaknesses.

We are all about establishing challenging but realistic aims for your business, rather than dabbling in financial engineering.

Our strategy is simple and proven: intelligent support backed by effective mentors and, crucially, the establishment of quality networks.

From technology and healthcare to food products and entertainment, EV understands the realities of running and developing a modern, successful business.

**Find out if we are right for your business
and your business is right for us.**

Visit www.evgroup.uk.com to read in detail about how EV works and exactly how your business could possibly fit into our portfolio of companies.

Invests at various stages of the business cycle,
from expansion to refinancing.

Develops unique and protected technology
with specific exit strategies in place.

Funds SMEs in a proven and flexible way,
at all stages of development.
